

Top tip - Colour match your blind styles for a co-ordinated look.

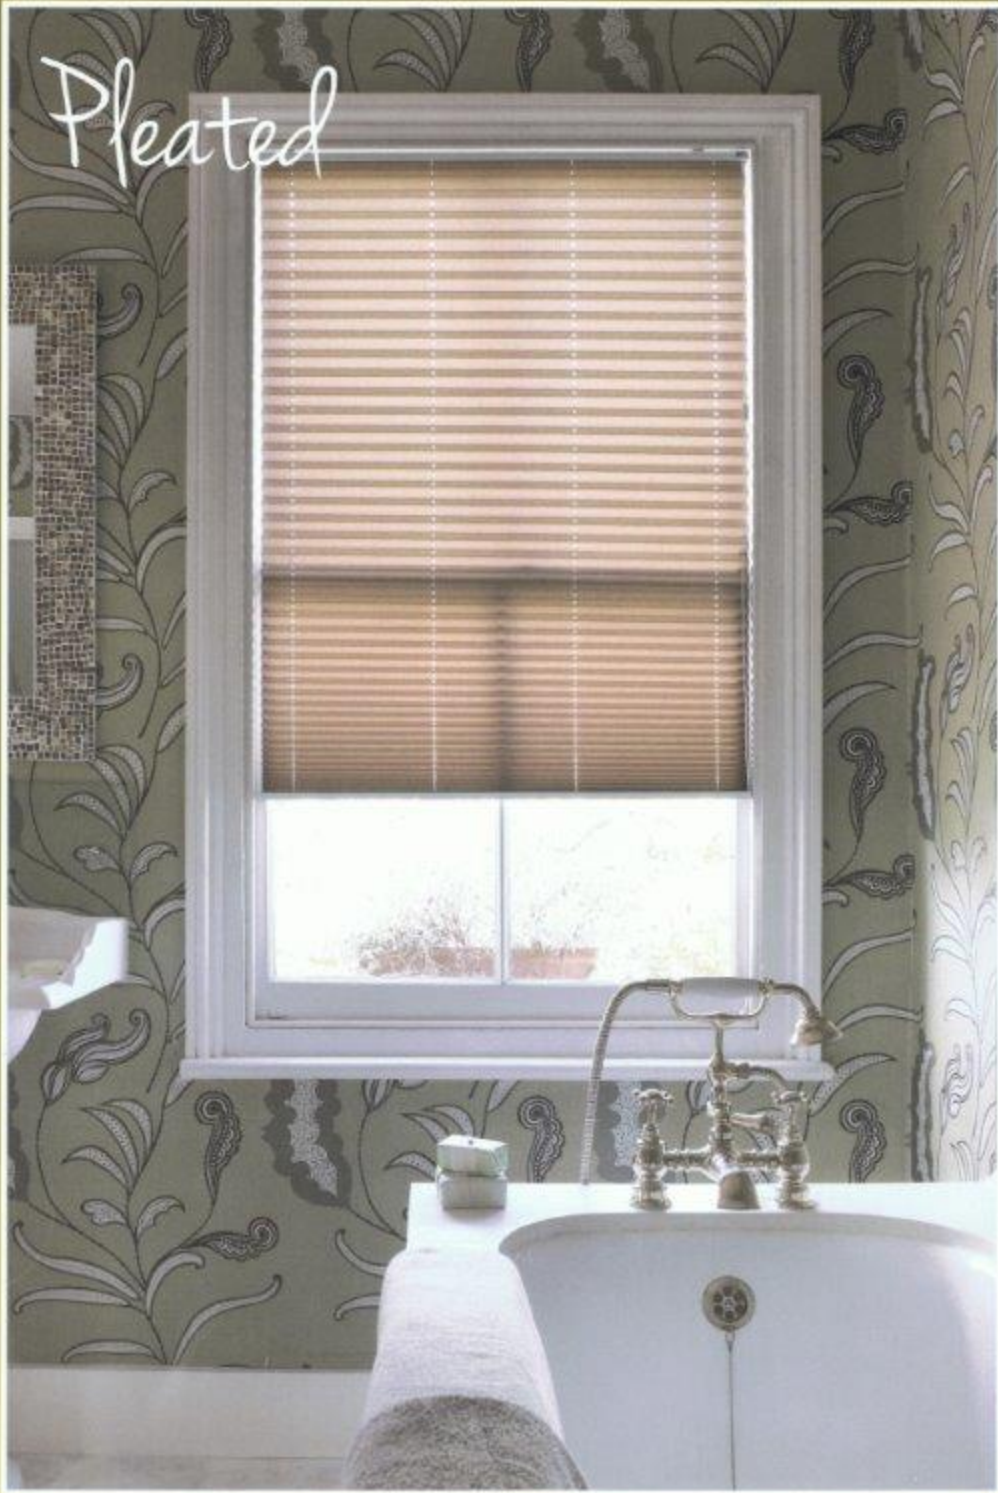

Be inspired

By our luxurious collection of blinds & shutters

Pleated

Wood Expressions

They look like wood with a consistent regular grain but are actually made from PVC. This makes our Expressions collection a perfect choice for kitchens and bathrooms as they're flame retardant, moisture resistant and easy to wipe clean.

Wood Expressions are available in three slat widths - 38, 50 and 63mm and seven colours.

63mm

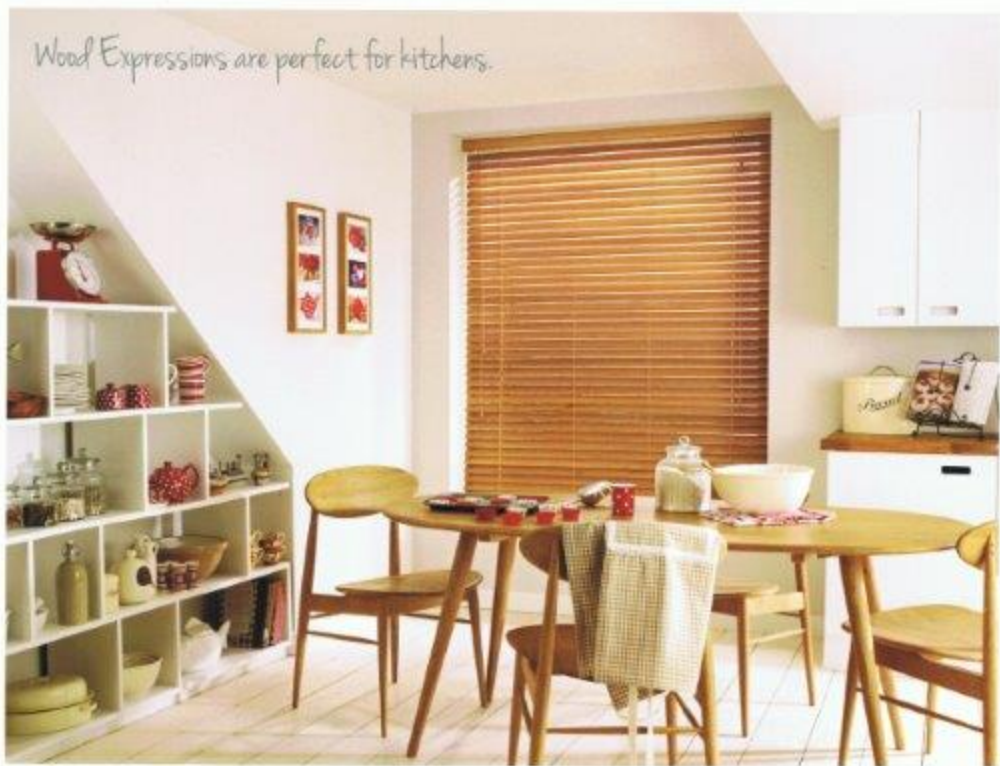

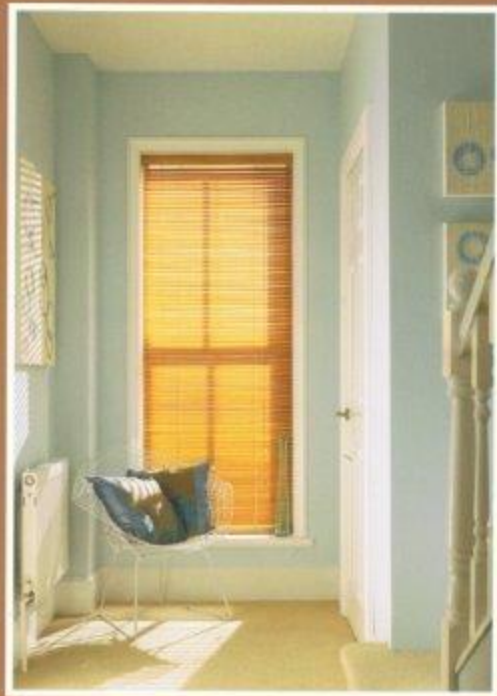

50mm

38mm

Wood Expressions are perfect for kitchens.

Sherwood Wood

Sleek, chic and stylish, a beautifully made wooden venetian blind can be as aesthetically pleasing and room changing as a lovely piece of furniture. Renewably sourced with careful consideration for the natural environment, our Sherwood collection is a stunning mix of 28 finishes in both natural wood and contemporary painted shades.

From fresh, coastal-inspired whites to rustic greys and the beauty of light and dark wood, the colour palette reflects and complements the latest interior trends.

Current trends are moving towards the widest slats to emulate the colonial look of a shutter with white being the most popular colour.

With almost limitless versatility, pleated blinds are a great way to dress windows, folding neatly away to give a sleek appearance and maximum control of light in the home. Pleated blinds are simple and practical and work well in any setting whether it's modern, traditional or period. They filter the light beautifully.

Neat pleats give a full effect creating a more cosy feel to a room. They are available with a number of different treatments including a solar reflective backing so the blind can reflect heat and light from the sun to help keep you cool in the summer whilst retaining heat in the chillier months.

Top tip - Sheer pleated blinds are a stylish alternative to net curtains.

Metal Venetians

Offering fantastic light control and privacy, metal venetians are often seen in a modern environment however the huge choice of colours, textures, and finishes really offers something for everyone's taste.

Available in 15mm, 25mm, 35mm and 50mm slat widths, there are 115 colourways to choose from.

Woodweave

Tactile natural materials including jute, bamboo and wood are carefully selected from renewable sources and woven together to give a wonderful rustic effect that allows light to softly filter through.

The overall effect is a relaxed and mellow atmosphere that looks good in both contemporary and traditional living spaces. dimensions woodweave blinds work just like a roman blind, folding up neatly and firmly locking into place.

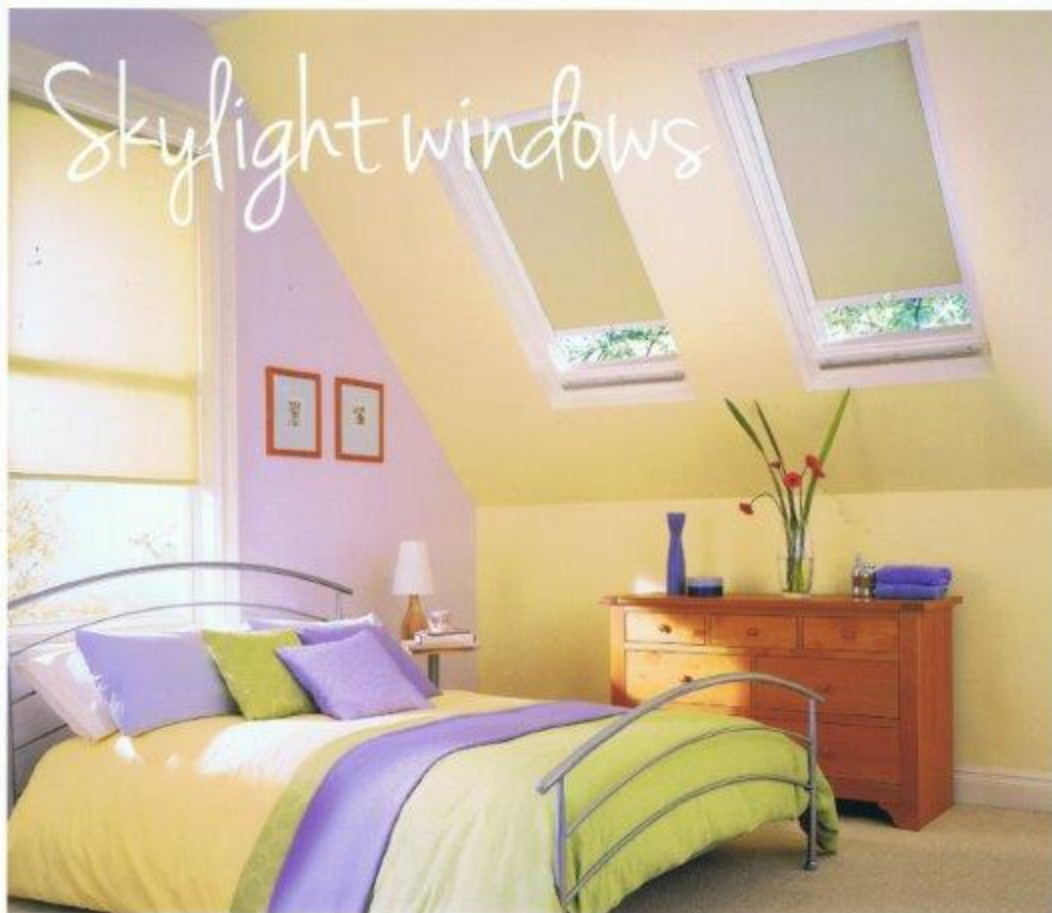

All of dimensions rollers fabrics are now available as a roller in a Perfect Fit frame.

Whether you fancy a contemporary design for the living room, a blackout fabric for the bedroom or a moisture resistant fabric for the bathroom, our collection in combination with the Perfect Fit system, are the ultimate in practical style.

ChildSafe

child safety

We are proud to support the Make it Child Safe campaign. We are committed to ensuring that free child safety devices are available for all blind cords and chains in homes where babies or young children live or visit.

Skylight windows

Skylight windows are a practical way to create lighter rooms but sometimes you'll want to soften the light or block it out all together.

Our Easi-stop rollers can be made to fit almost any skylight window and come in more than 220 different fabrics.

And if your skylight window is in a bedroom you'll probably want to opt for a blackout roller fabric so you're not getting up when the sun does!

Pleated or venetian blinds are also good options.

Perfect Fit Rollers

For a window dressing that's contemporary, sleek, child safe and requires no drilling to fit, consider a roller blind in a Perfect Fit frame. This is a system that's suitable for most double glazed windows and doors. A discreet bracket sits between the beading and the glass of your window and the Perfect Fit frame and the blind simply clicks into position to provide a neat finish which looks integral and moves with the window or door.

There are other benefits too. As there are no cords, they are perfect for children's bedrooms, and no light can creep around the sides of the blind. This also gives enhanced privacy and your window sills are kept free.

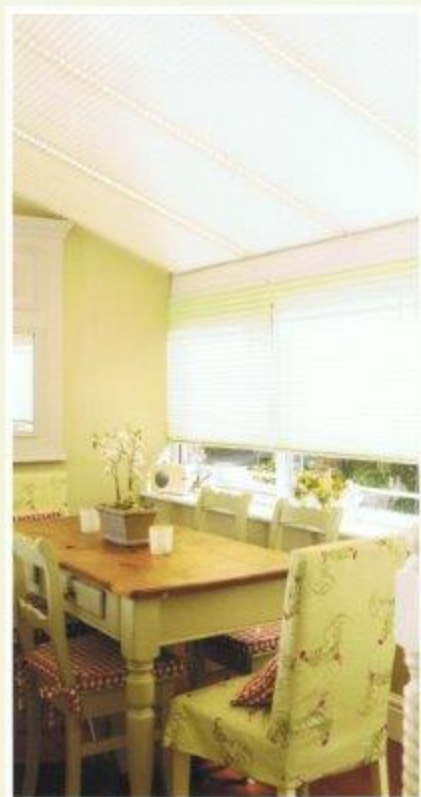

Conservatory blinds

Conservatories or glass extensions are a fantastic addition to any home and can be used as a kitchen, playroom, a retreat room from the kids or even extra bedroom space. Whatever its use or size, one thing it's bound to have is lots of glass. This does mean that temperatures can soar in the hot summer months and plummet during cold winter months.

Blinds will not only transform a conservatory to give it a totally individual look and the privacy that you need but using fabrics with special reflective backing will help to maintain temperatures in the room.

Our pleated blinds are perfectly suited to conservatory and skylight windows, making light work of those awkward shapes in the roof avoiding the 'goldfish bowl' effect of bare glass.

And if you can't decide between wood and metal why not opt for both? Our Unity collection is an unusual, contemporary concept which combines sleek but generously sized 50mm aluminium slats with a co-ordinating or contrasting wood valance and bottom rail.

There are 14 different set colourways to choose from including chic white, dramatic black and the warmth of wood grain finishes.

Metal venetians can also be fitted in a Perfect Fit frame which means they fit snugly inside uPVC windows. They're ideal for conservatories, tilt n' turn windows or even back doors as you can open your windows without having to pull the blinds up first.
